EDUCATION

Northeastern University

Bachelor of Arts in Business Administration

Relevant Coursework: Accounting, Business + Society, Microeconomics, etc.

New York, NY

Aug. 2024 – May 2028

EXPERIENCE

UI//UX Designer

Medara

March 2026 – Present

New York, NY

- Manage and continuously optimize website content, structure, and user experience to improve clarity, engagement, and alignment with company objectives
- Develop and execute social media strategy, including content planning, creation, and performance tracking to build brand presence and audience engagement
- Design and refine marketing collateral and support UI/UX enhancements, translating company messaging into clear, visually compelling materials

UI/UX Designer

Rossitech LTD.

Aug. 2025 – Oct. 2025

Remote

- Led end-to-end web design projects for clients launching their first digital presence, leveraging Figma, Framer and other online tools to create visually compelling, mobile-optimized, and high-converting websites.
- Refined prototypes through multiple-round testing, evolving designs to improve user flow, reduce friction, and elevate anticipated conversion rates.

Analytics/BI Intern

Apple Montessori Schools

Nov. 2023 – Present

Westfield, NJ

- Automated KPI dashboards in Power BI integrating HR, finance, and enrollment data across 20+ schools, reducing manual reporting time by 50% and saving leadership 5+ hours monthly.
- Delivered real-time performance analytics that directly informed pricing strategy, staffing decisions, and market expansion planning.
- Integrated and cleaned 3+ years of data from multiple CRMs and billing platforms, mapping full customer journey and identifying conversion bottlenecks that increased enrollment rates.
- Built predictive enrollment models tracking 20+ schools, improving forecast accuracy by 50% and generating data-driven recommendations that reduced student attrition by 10%.
- Streamlined the acquisition process, managing 100+ active targets, preliminary diligence and accelerating go/no-go decisions.

PROJECTS

NYC Fare Analysis | *Python*

Nov, 2025 – Dec. 2025

- Developed a Python-based model to uncover \$277M in MTA revenue gaps, utilizing Pandas and NumPy to analyze 5+ years of ridership data and visualizing cost-leakage points that static reporting missed.
- Proposed a data-backed pricing optimization strategy to recover lost revenue without increasing consumer fares, demonstrating how algorithmic adjustments can improve revenue solvency.

SpeedReader | *JavaScript, CSS, HTML, Git, React, Next.js*

Dec. 2025 – Jan. 2026

- Engineered a high-precision Speed Reading web application using React and Next.js, implementing Rapid Serial Visual Presentation (RSVP) to enable distraction-free reading at speeds up to 1000 WPM.
- Developed an Optimal Recognition Point (ORP) display logic that dynamically calculates and centers a "focus character" for every word, significantly reducing saccadic eye movements and increasing reading efficiency.

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy), JavaScript, SQL, HTML/CSS

Frameworks: React, Next.js, Framer

Developer Tools: Git, Figma, PowerBI, Vercel, VS Code

Libraries: Matplotlib, Seaborn, React Hooks
